

Production shedule

The production of Oranges in Naturitalia's system is made in the most vocated regions of Southern Italy.

product are widespread all over subtropical and temperate areas, to cultivate those type of trees the soli must be: middle grade, full of organic substances and well drained. The fruit has a spherical form with a skin full of lenticels. The skin and the flesh are orange or red colored. The flesh is rough, juicy, sweet and acid at the same time, can be also seedless.
