

Production

The production of Peaches in Naturitalia's system are in the most vocated Regions of North and Southern Italy.

product Peaches production is widespread all over temperate climate regions; native from Asia the plant has no problem with winter cold temperature but is very sensitive to spring frost. This culture is usually settled on middle grade, deep, drained and no limestone soil. The color of the skin is intense red with a yellow background; the flesh is yellow, sometimes with red streaks, and tight. The sweet and acid favors are perfectly balanced.
